This survey is being conducted under the authority of Section 301 of the Public Health Service Act. The purpose of this survey is to evaluate the effectiveness of skills-building workshops in decreasing risk of HIV infection among youth. Participation is voluntary. A number of measures will be in place to protect your privacy. Data collection instruments will be coded with a participant identification number. The list linking name and number will be kept only until follow-up data are collected. When data have been entered into computer files and verified, all identifying information including the linkage sheet will be destroyed. Data provided to CDC or its evaluation contractor will not contain names or any other means of identifying individuals.

Public reporting burden of this collection of information is estimated to average 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the

collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to DHHS Reports Clearance Officer; Paperwork Reduction Project (0920-0343); Rm 531-H, H.H.
