

Logic Models for Planning and Evaluating State HDSP Programs

Handouts

CVH Institute 2005

Situation:

The State HDSP Program is funded by CDC to reduce stroke deaths. We believe that if we educate doctors and nurses about treating high blood pressure and about stroke signs and symptoms, they will work with patients to improve compliance with medication and lifestyle changes and recognize stroke. As part of our comprehensive state plan, we are going to provide training (or train-the-trainer series) on treatment protocols for high blood pressure and stroke signs.

Worksheet #1: Stakeholders

<i>Who are the key stakeholders we need to:</i>			
<i>Increase credibility</i>	<i>Implement activities</i>	<i>Advocate for the program</i>	<i>Fund or authorize expanding</i>

Worksheet #2: Sequencing

<i>Activities</i> →	<i>Outcomes/Effects</i>	
	<i>Early</i>	<i>Later</i>

Logic Model: Training Initiative

INPUTS	ACTIVITIES	OUTPUTS	OUTCOMES		
			SHORT	INTERMED	LONG
Contextual Factors / Assumptions
