

## Instructions for installing CancerSPACE

Click on the link to download CancerSPACE.

1. A window that prompts you to Save CancerSPACE to your hard drive will pop up. Choose to Open this file. A window will open that lists all the files needed to run CancerSPACE.
2. Either copy and paste the CancerSPACE files to a folder you create on your desktop, or choose to Extract All Files to a folder on your desktop.
3. Navigate to the folder where all the CancerSPACE files are stored.
4. Double-Click "default.htm" to launch CancerSPACE.
5. You will see a window titled "Welcome to CancerSPACE." Click the button marked "Play CancerSPACE!" to start the program.

Note: If necessary, you may need to alter your browser settings to allow Active Content to run on your computer. This will allow all the links in CancerSPACE to operate properly.

1. If you received a message bar (on the opening page or this current page) saying that Internet Explorer has restricted the file, your browser is not set to allow active content to run. To allow active content, select "Tools," "Internet Options" from the menu bar. Click the "Advanced" tab at the top of the screen. Go to the "Security" section. Make sure that "Allow active content to run in files on My Computer" is clicked.
2. Click "OK." Close the browser window.
3. Do steps 3-5 in the instructions above.
