

Terry M. Levinson
Senior Project Manager
Center for Transportation Research, Energy Systems Division
Argonne National Laboratory

Ms. Levinson currently works with the U.S. Department of Energy (DOE) Office of FreedomCAR and Vehicle Technologies on issues related to outreach, technology transfer, and environmental science and health effects. Until her early retirement from DOE, she had served as Acting Director of the Office of National Programs, Director of the Energy-Related Inventions Program, Program Manager for Tribology, and Special Assistant to the Director of the Office of Energy Utilization Research. During her career, she has spent more than 10 years working in the area of advanced transportation technologies. She has worked for more than 30 years in DOE and its predecessor agencies. Earlier she had worked for the U.S. Geological Survey.

Ms. Levinson has a B.A. in geology from Washington University in St. Louis, Missouri. She is a member of the Society of Automotive Engineers and president of the Washington, D.C., Chapter of the Technology Transfer Society.
