

**Joseph L. Suchecki**  
**Director, Public Affairs**  
**Engine Manufacturers Association**

Mr. Suchecki is Director of Public Affairs with the Chicago-based Engine Manufacturers Association (EMA). EMA is the trade association representing the major manufacturers of internal combustion engines used in a wide variety of applications including trucks and buses, agricultural and construction equipment, marine, locomotives, lawn, garden and utility equipment, and stationary sources, such as electric generators.

Mr. Suchecki's responsibilities at EMA include public relations, federal and state government affairs, and health and environmental issues. He is also responsible for EMA activities related to emissions and standards for stationary source engines including issues related to distributed energy and combined heat and power applications. He has been actively involved in recent regulatory and legislative activity at the state level in California, Texas, and the Northeast States.

Prior to joining EMA five years ago, Mr. Suchecki worked in government affairs and environmental management for several major corporations including Waste Management, Inc., Safety-Kleen Corporation, Wisconsin Public Service Corporation, and Nalco. His education includes an undergraduate degree in mathematics from New York University, a Master's Degree in Ecology from University of Connecticut, and an MBA in Technology Management from Illinois Institute of Technology.
