

**Diane Turchetta**  
**Environmental Protection Specialist**  
**Federal Highway Administration**  
**U.S. Department of Transportation**

Diane Turchetta works in the Office of Natural Environment where she primarily works on transportation-related air-quality issues including climate change, energy use, and alternative fuels. Before coming to the U.S. Department of Transportation, she worked at the U.S. Environmental Protection Agency on fuel-related issues and served as National Program Manager for the Oxygenated Fuels Program.

She holds a B.S. degree in Public Administration from the Pennsylvania State University and an M.S. in Public Administration from Virginia Polytechnic Institute and State University.
