Facility Maintenance Management Competency 2.2

Competency 2.2 Facility maintenance management personnel shall demonstrate a working level knowledge of the requirements for training and qualification program as identified in the following Department of Energy (DOE) Orders:

- DOE Order 5480.20, Personnel Selection, Qualification, Training, and Staffing Requirements at DOE Reactor and Non-Reactor Nuclear Facilities
- DOE Order 4330.4B, Maintenance Management Program

1. Supporting Knowledge and Skills

a. Discuss the meaning of qualification and its importance to maintenance.

b. Describe the purpose and scope of DOE Order 5480.20, Personnel Selection, Qualification, Training, and Staffing Requirements at DOE Reactor and Non-Reactor Nuclear Facilities.

c. Discuss why certain skills or proficiencies should be demonstrated periodically.

d. Using DOE Order 5480.20, Personnel Selection, Qualification, Training, and Staffing Requirements as a reference, describe the general requirements to which a Management and Operating (M&O) contractor is held at Category 1, 2, and 3 facilities in the following areas:
   - Qualification and certification of facility personnel
   - Training and qualification of sub-contractors
   - Continuing training and requalification
   - Exceptions and alternatives to requirements of DOE Order 5480.20
   - Personnel selection
   - Training and qualification

e. Using DOE Order 5480.20, Personnel Selection, Qualification, Training, and Staffing Requirements as a reference, state the entry level requirements for various facility positions.

f. Describe the purpose and scope of Chapter II, Section 3, of DOE Order 4330.4B, Training and Qualification of Maintenance Personnel.

g. Discuss the responsibility of the maintenance organization in the training and qualification of their personnel.

h. Discuss the requirements of Chapter II, Section 3, DOE Order 4330.4B, Training and Qualification of Maintenance Personnel, regarding training facilities.
i. Describe the elements of an effective on-the-job training program.

j. Discuss the maintenance manager's responsibilities in the approval, effectiveness, and feedback cycles of the maintenance training program.

2. Self-Study Activities

Below are two web sites containing many of the references you may need.

NOTE: DOE Order 5480.20, Personnel Selection, Qualification, Training, and Staffing Requirements at DOE Reactor and Non-Reactor Nuclear Facilities was replaced by 5480.20A, Personnel Selection, Qualification, and Training Requirements for DOE Nuclear Facilities.

**Read** Chapter I of DOE Order 5480.20A, Personnel Selection, Qualification, and Training Requirements for DOE Nuclear Facilities.

**Read** Section 3.1.4 and Chapter II, Section 3, of DOE Order 4330.4B, Maintenance Management Program.

**EXERCISE 2.2-A** Discuss the meaning of qualification and its importance to maintenance.

**EXERCISE 2.2-B** What are the purpose and scope of DOE Order 5480.20A, Personnel Selection, Qualification, and Training Requirements for DOE Nuclear Facilities?

**EXERCISE 2.2-C** Discuss why certain skills or proficiencies should be demonstrated periodically.
Facility Maintenance Management Competency 2.2

EXERCISE 2.2-D Describe the general requirements to which a Management and Operating contractor must meet for the following areas:
- Qualification and certification of facility personnel
- Training and qualification of sub-contractors
- Continuing training and requalification.
- Exceptions and alternatives to DOE Order 5480.20A requirements
- Personnel selection
- Training and qualification

EXERCISE 2.2-E Using DOE Order 5480.20A as a reference, state the entry level requirements for various facility positions.

EXERCISE 2.2-F Describe the purpose and scope of Chapter II, Section 3, of DOE Order 4330.4B.

EXERCISE 2.2-G Discuss the responsibility of the maintenance organization in the training and qualification of their personnel.

EXERCISE 2.2-H Discuss the requirements of Chapter II, Section 3 of DOE Order 4330.4B regarding training facilities.

EXERCISE 2.2-I Describe the elements of an effective on-the-job training program.

EXERCISE 2.2-J Discuss the maintenance manager’s responsibilities in the approval, effectiveness, and feedback cycles of the maintenance training program.

3. Summary

DOE’s objectives are to ensure the development and implementation of contractor-administered training programs that provide consistent and effective training for personnel at DOE nuclear facilities. DOE Orders 5480.20A and 4330.4A contain minimum requirements that must be included in contractor training and qualification programs for maintenance personnel. The requirements are based on DOE, Nuclear Regulatory Commission (NRC), and related industry standards, and are applicable to all operable DOE nuclear facilities. Because the operation of DOE reactor and non-reactor nuclear facilities involves certain risks to employees, the public, and the environment, well-trained and qualified operating organization personnel are of extreme importance. A vital element in ensuring a well-trained and qualified work force is the implementation of the systematic approach to training (SAT). This approach has proven effective in the commercial nuclear power industry and in other major industries;
therefore, the Department requires that training programs for personnel in the operating organizations at DOE nuclear facilities are established using SAT. Experience has also shown that better-operating nuclear facilities have well-defined, effectively administered policies and procedures to control the activities associated with personnel training. The Orders require the establishment and implementation of training-related procedures.

4. Exercise Solutions

EXERCISE 2.2-A Discuss the meaning of qualification and its importance to maintenance.

ANSWER 2.2-A Qualification is defined in terms of education, experience, training, examination, and any special requirements necessary for performance of assigned responsibilities.

Training and qualification programs are important to develop and maintain the knowledge and skills required by maintenance personnel to effectively perform maintenance activities.

EXERCISE 2.2-B What are the purpose and scope of DOE Order 5480.20A, Personnel Selection, Qualification, and Training Requirements for DOE Nuclear Facilities?

ANSWER 2.2-B The purpose of DOE Order 5480.20A is as follows: “To establish selection, qualification, and training requirements for management and operating (M&O) contractor personnel involved in the operation, maintenance, and technical support of Department of Energy-owned (DOE-owned) Category A and B reactors and non-reactor nuclear facilities.”

The Order is applicable to all Departmental Elements which are responsible for operable DOE-owned Category A and B reactors and non-reactor facilities. The Director, Naval Nuclear Propulsion Program, is exempt from this Order. Attachment 1 sets requirements that are to be applied to the universe of contractors awarded DOE management and operating contracts involving operable DOE-owned Category A and B reactors and non-reactor nuclear facilities. (Paragraph 3)
EXERCISE 2.2-C Discuss why certain skills or proficiencies should be demonstrated periodically.

ANSWER 2.2-C Certain skills should be demonstrated periodically to ensure adequate maintenance of the required skills. This is especially important for skills that are performed infrequently but are difficult to perform and are very important to safe operations.

EXERCISE 2.2-D Describe the general requirements to which a Management and Operating contractor must meet for the following areas:

- Qualification and certification of facility personnel
- Training and qualification of sub-contractors
- Continuing training and requalification.
- Exceptions and alternatives to DOE Order 5480.20A requirements
- Personnel selection
- Training and qualification

ANSWER 2.2-D The following matrix outlines the location of DOE Order 5480.20A requirements for the listed areas.

EXERCISE 2.2-F Describe the purpose and scope of Chapter II, Section 3 of DOE Order 4330.4B.

ANSWER 2.2-F The purpose of this section is to describe the implementation of training and qualification programs for maintenance personnel. Guidance is also provided for training program evaluation and recordkeeping.
EXERCISE 2.2-G Discuss the responsibility of the maintenance organization in the training and qualification of their personnel.

ANSWER 2.2-G The maintenance manager and supervisors should be directly involved in training maintenance personnel. This involvement should, as a minimum, include close coordination with the contractor training organization to establish and maintain course content and emphasis, determine and support training schedules, accomplish on-the-job training (OJT), and provide feedback to adjust course content and emphasis, as necessary.

The training organization should maintain maintenance training programs that meet the intent of established industrial guidelines and that address specific company and facility needs. These training programs are supported and guided by the maintenance organization. This support and guidance normally includes all or a portion of the following tasks:

- Defining the jobs, tasks, skill levels, and responsibilities of individuals in these positions;
- Defining training programs for each position;
- Determining the content and emphasis of the training needed;
- Determining and supporting training schedules;
- Determining the training needs of and tailoring the training program for each individual based on his previous education, training, experience, and skill level;
- Providing instructors and trainers;
- Establishing qualification criteria, with emphasis on successful performance in the field;
- Coordinating the conduct of, and instruction during, OJT;
- Qualifying individuals as they complete their training programs; and
- Providing training-effectiveness feedback to the training organization to enhance and, where necessary, adjust course teaching methods, content, and emphasis.
EXERCISE 2.2-H Discuss the requirements of Chapter II, Section 3 of DOE Order 4330.4B regarding training facilities.

ANSWER 2.2-H Facilities to support maintenance training are a key consideration in obtaining safe, efficient, and high-quality maintenance. The maintenance manager should be involved in the construction of new maintenance training facilities and renovations to existing facilities. Considerations for these facilities and equipment should include the following:
- Training class size;
- Type of training (e.g., classroom, laboratory, on-the-job training);
- Use of mockups;
- Environmental controls;
- Services (e.g., electricity, air, water, and gas);
- Training equipment (e.g., lecture boards, projectors, and screens, and simulators); and
- Equipment similar to that installed in the plant for practical training.

EXERCISE 2.2-J Discuss the maintenance manager’s responsibilities in the approval, effectiveness, and feedback cycles of the maintenance training program.

ANSWER 2.2-J The maintenance manager should be directly involved in approving and periodically reviewing the maintenance training program. The performance of maintenance personnel should be monitored to identify initial and continuing training program enhancements and emphasis. (Sections 15, 16, and 17 of DOE Order 4330.4B provide guidance on monitoring maintenance performance.) The trainee’s feedback on his perception of and suggestions for improving the training program should be obtained. Any performance trends that indicate maintenance knowledge or skills needing improvement should be considered during the review of the maintenance training programs. Changes to the training programs by the training organization should include recommendations from the maintenance manager.
