Training and Development Group
Training Course Bulletin

Course Name: PMCDP Advanced Risk Management

Course Number: 001042

Session Number: 0014

Description: This course is part of the Project Management Career Development Program (PMCDP). It is an elective course for PMCDP Level 4 Certification. This course covers a range of project management issues specific to the competency needs of a Level 4 Project Manager.

The objective of this course is to provide students with an overview of more advance Risk Management principles. The training will build upon the concepts included in the basic course and will review topics that are appropriate for Level 2 Federal Project Managers. In addition to a review of topics covered in the basic course, students will receive training on the impact of technology development and how new technology risk affects the typical project. The course also integrates a representative project management software risk analysis tool, using laptop computers, to demonstrate current modeling tools and techniques in managing risk.

Target Audience: Level 4 Federal Project Managers, prospective Project Managers. Attendees at this course should have 20 years experience in Project Management and should currently be sitting in a project management position of a project with a total project cost over \$400M. (non-PMCDP participants can attend on a space available basis only.)
