Training Course Bulletin

Course Name: PMCDP - Project Management and Portfolio

Course Number: 001025

Session Number: 0021

Description: Program Management and Project Portfolio Analysis is part of the Project Management Career Development Program (PMCDP). It is required for PMCDP Level 3 certification and information technology (IT) project management certification, but it may apply to other levels of project director development. Focusing on collaboration, defending resources, and creative compromise, this automated simulation and case study addresses developing a strategic view of projects, managing priorities among projects, coordinating the information needs of multiple projects across the organization, allocating and managing resources across a project organization, preparing project staff to meet future technical/managerial needs, balancing responsibilities for project and functional management, and applying project management methods in a complex project setting.

Audience: Federal project directors, IT project directors, and prospective project directors. Attendees should have at least seven years experience in project management and should currently have a position in a project or program with a total project cost (TPC) of at least 100 to 400 million dollars; however, it will be beneficial to PMCDP participants seeking higher levels of certification and to DOE staff engaged in multi-project planning. (TPC may differ for IT project directors.)

Vendor: Colleague Consulting LLC

Instructor: Larry Suda

Slots: 20

Location: Building 2714, Room C1-C2

Date: February 14-18, 2011

Time: 8:00 to 4:00
