Taking Care of Business:

Making Healthy Choices

Mrs. Ida Smith gets a flu shot every year.

The flu shot is:

- ☐ **safe**
- ☐ **effective**
- ☐ **covered by Medicare Part B**

(*See other side for correct answer)

Georgia Medical Care Foundation (GMCF) is a nonprofit organization federally funded by the Health Care Financing Administration to oversee the quality of care for Georgia's Medicare beneficiaries. For questions about Medicare, please call the GMCF Medicare Helpline 1-800-979-7217– Atlanta Dialing 404-982-7575.

Answer:

All three choices are true.

The people in the Medicare Program and the Horizons Pilot Project (Horizons) partners want you to know that you are at risk of getting the flu.

You should get a flu shot each year. The flu shot is safe and effective but you need to get the shot every fall. Medicare Part B covers flu shots. Call your doctor, or visit your clinic or health department.
