and Immigration
Services

United States Citizenship and Immigration Services (USCIS)

Mission: U.S. Citizenship and Immigration Services secures America's promise as a nation of immigrants by providing accurate and useful information to our customers, granting immigration and citizenship benefits, promoting an awareness and understanding of citizenship, and ensuring the integrity of our immigration system.

Cyber Snapshot: USCIS runs a next generation Information Technology Security program responsible for the protection of the USCIS network, systems, and information. We do this by employing the best and brightest in the areas of cyber defense, cyber intelligence, information assurance, forensics, and identity management.

USCIS is especially interested in students that have completed coursework or previous work assignments related to: threat analysis; risk assessment; incident response; security architecture and engineering; network monitoring/network defense; cybersecurity research and technical writing; basic knowledge and understanding of industry best practices regarding policies, governance, strategies and standards in cybersecurity; and testing and development.
