

## SECTION 4.6

### JOB HAZARD ANALYSIS

#### SAMPLE SCREENING

1.0 Discussion: Each survey site is unique and the specific hazards associated with media sampling vary from site-to-site. Normally expected hazards associated with these tasks are provided below together with standard controls.

#### 1.1 Sample Screening

JOB HAZARD ANALYSIS		
ACTIVITY	HAZARD	CONTROLS
A. Sample screening	A1. Radiation/Contamination	A1. Use disposable gloves and protective clothing when screening samples known or suspected to contain high activity levels, minimize sample contact, label sample in accordance with procedures, monitor personnel and equipment for contamination. Samples that have had the package compromised and have leaked will require monitoring, protective equipment, and notification of the Laboratory Manager.
