

Seeking Health Science Library Staff for *NLM Library Communications Support*

Deadline to Express Interest: November 28, 2022, 11:59 Eastern Standard Time (EST)

The National Library of Medicine (NLM) Office of Engagement and Training (OET) is seeking 3 to 4 health science library staff with experience in library communications. Staff familiar with biomedical and public health data sets preferred. This opportunity is part of a new initiative funded by NLM OET to increase access to and awareness of the [All of Us Researcher Workbench](#).

What will I be doing? You will collaborate with NLM OET and project staff to provide subject matter expertise on library communications as it relates to the *All of Us Researcher Workbench* tasks and deliverables. Related tasks and deliverables may include:

- Promoting and amplifying the *All of Us Researcher Workbench* informational and instructional activities to health sciences and other academic libraries
- Various communications to guide health science/academic libraries on how to use the *All of Us Researcher Workbench*.
- Serve as reviewer and provide feedback on outreach materials and assets that will be disseminated by health science/academic libraries to their campus communities

When will I be needed? December 2022 through February 2023, with potential for additional consultation in spring 2023

Is there an Honoraria for this project? Yes. You will receive honoraria up to \$2500 for providing your expertise to the project. Honoraria amounts are subject to the tasks and deliverables supported.

How do I express my interest? Email Jennifer Burnette at jennifer.burnette@orau.org. In your email, please provide your resume and a brief description of your experience with library communications and biomedical and public health data sets (if applicable). Emails will be assessed as they are received until space is filled.

ORAU, a 501(c)(3), not-for-profit organization, administers this contract on behalf of the National Library of Medicine Office of Engagement and Training.

Additional Information about NLM OET and the *All of Us Researcher Workbench*

The Office of Engagement and Training at the National Library of Medicine (NLM) is a key engagement partner in the NIH *All of Us Research Program*, working with a network of

partners, healthcare provider organizations, and the Network of National Library of Medicine (NNLM). *All of Us* and the NLM are bringing education opportunities for health sciences and other academic libraries across the United States to learn about and access the *All of Us* Researcher Workbench. As centers of campus research, health sciences and academic libraries are well situated to educate staff, students, and campus communities on how to access, use, and participate in research using the *All of Us* Researcher Workbench.

The [All of Us Researcher Workbench](#) provides access to diverse study participant data to advance precision medicine, housed in a cloud-based platform. Data in the Researcher Workbench includes demographics, survey responses, physical measurements, electronic health record information, genomics, and wearables data. This brief video explains the potential of using the Researcher Workbench: https://youtu.be/t_bUJDH6zbc.
