Topic 1: Roles for Government and Industry in a National Quantum Computing Ecosystem

Speakers and Discussion Leaders: Anne Matsuura (Intel) and Brian Lally (DOE)

The discussion will focus on two areas:
1. Ways individual workshop participants envision government getting involved
2. Specific examples of government-industry partnerships that could be developed and what these partnerships could accomplish.

Additional discussion topics could include (but not limited to): industry interactions with DOE testbeds, IP management, and government role in transitioning technology.
